

PESI 2030 vision on the Smart & Resilient City

Concept of Secure Society could be very broad from different perspectives (*safety, security, cybersecurity*) or focus (*resilience, protection, emergencies, reliability, industrial, road safety, Health, wellbeing...*). ETPIS and PESI have face future challenges for the Smart and Secure Safety & Communities through four **main pillar**:

1. A **Governance model for integral risk management and resilience** of the essential services (CI Operators) for citizens,
2. **Reliability** of Utility networks and urban infrastructures and installations,
3. **Security and protection of citizens, Infrastructures and heritage of the City**
4. And the **cyber-security of control systems in the City** (utilities networks, urban systems and infrastructures related to essential services).
